Chapter 360: Infinite Growth and Compression

Sung Jin-Woo, the True Absolute One, continued his ascension beyond comprehension. His evolution, fueled by the infinite reservoir of divine power within his five divine jewels, drove his physical form to expand further.

As his body grew to encompass a million realms in size, the multiverse itself strained to accommodate his immense presence. Yet, Sung Jin-Woo was not hindered by these limitations. His mastery over existence allowed him to compress his colossal form, maintaining a size of only one realm, ensuring harmony within the multiverse.

The Nature of Infinite Growth

Sung Jin-Woo's evolution defied the very laws of the multiverse. Each time his body expanded, it was not mere physical growth but a manifestation of his increasing authority and power.

1. A Body of Creation: His form now held the essence of stars, galaxies, and realms, each cell capable of birthing entire universes.

2. Wings of Eternity: His wings, numbering over 60 million, emitted an aura of shadow and light that spanned across dimensions, reinforcing the stability of all existence.

3. Compression Mastery: Despite his immense size, Sung Jin-Woo maintained the ability to compress his form into the scale of a single realm. This compression did not diminish his power but instead concentrated it, making him even more formidable.

Adjusting to New Realms of Power

Within the True Absolute One Domain, Sung Jin-Woo adjusted his throne to match his evolving size and power. The throne now radiated an aura that mirrored his own: infinite, indomitable, and divine.

To ensure the multiverse remained undisturbed by his overwhelming presence, Sung Jin-Woo created dimensional barriers around the True Absolute One Domain. These barriers absorbed and redirected the energy waves emanating from his body, preventing disruption to the realms below.

The Ripple of Evolution

Sung Jin-Woo's evolution sent waves of power through the multiverse.

1. Strengthening All Realms: The energy radiating from his growth infused every realm with stability and vitality, ensuring no dimension would collapse under external pressure.

2. Empowering Followers: The Divine Triad’s followers and priests found their powers amplified as Sung Jin-Woo’s strength increased. Even the Twelve Divine Beings marveled at the blessings they received.

3. New Celestial Phenomena: Stars and galaxies formed spontaneously in the multiverse as a result of the energy released during his evolution.

A Moment of Reflection

As his evolution continued, Sung Jin-Woo gazed across the multiverse. His all-seeing eyes, now capable of perceiving infinite possibilities, scanned every corner of existence.

"To grow endlessly, yet remain bound by responsibility… This is my path," he thought.
Despite his unimaginable size and power, Sung Jin-Woo remained steadfast in his duty as a protector and creator.

The True Absolute One’s Vision

Even as his body expanded to a scale beyond comprehension, Sung Jin-Woo’s purpose did not waver. He envisioned a future where all realms thrived, free from fear and destruction.

"A million realms... a million lives to safeguard," he mused. "Yet, I will never stop growing. There is no limit to what I can become or create."

And so, Sung Jin-Woo’s journey of evolution continued, his infinite growth balanced by his infinite resolve to protect and nurture the multiverse.
